ABOUT ME

My name is Emediong and I am a full Stack JavaScript developer with over 4 years of experience. I've always been passionate about programming and feel lucky to have turned that passion into a career.

While I've learned a lot over the years, I'm always looking for ways to grow and keep improving. Seeking to apply my skills as a Web Developer and contribute to your company.

WORK HISTORY

GoShop, Uyo, Nigeria (CONTRACT WORK) @ALPHA'S HACK (https://goshop-app.vercel.app)
Feb 2025 – May 2025

Frontend Developer
- Worked in modern web technologies (Next.js, Clerk, Prisma).
- Developed and maintained the frontend of GoShop's web-based platform, ensuring a smooth and intuitive user experience.
- Collaborated with cross-functional teams, including designers, and backend engineers, to implement new features and functionality.
- Contributed to the development of GoShop's design system, including defining and documenting practices for reusable UI components.
- Developed robust product pages with variant management, live watcher counts, and customizable shipping details by country.
- Implemented advanced features like seller-specific shipping fees, quantity-based shipping rates, and weight-based calculations.
- Learned to manage global settings like categories, offers, and admin-level store approvals.
- Designed and implemented user-friendly admin, seller, and store dashboards for seamless management.

Brickswork, Uyo, Nigeria @SOFROSYN (https://brickswork.onrender.com/api-docs/#/)
Nov 2024

Backend Developer
- Worked in modern web technologies (Node, Express, MongoDB).
- Developed and maintained the backend of Brickwork's web-based platform.
- Collaborated with cross-functional teams, including designers and frontend engineers, to implement new features and functionality.
- Managed API deployment on Render.

Sky Ventures, Abuja, Nigeria @SKYVENTURES (https://sky-ventures.onrender.com/api-docs/#/)
Oct 2024

Backend Developer
  • Worked in modern web technologies (TypeScript, Node.js, Express, MongoDB).
  • Worked on a Simple RESTful Task Management API with user permissions.
  • Implemented sufficient test coverage using Jest.
  • Containerized backend app using Docker.
  • Managed API deployment on Render.

GetProsperi, CapeTown, SA @STUDIO VENTURIS (https://api.getprosperi.com/api-docs/#/
Oct 2024 – Jan 2025

Lead Developer
  • Led a team of 2 full-stack developers to build the web marketing page (React, TypeScript) and the mobile app (Flutter) - Android - (https://play.google.com/store/apps/details?id=com.nklivia.egoapp) and iOS - (https://apps.apple.com/us/app/prosperi/id1521847714).
  • Worked closely with a Senior Developer and contributed to the smooth backend migration from Firebase to Supabase by duplicating user data and syncing systems with zero user disruption.
  • Delivered training in Supabase, and Firebase to Junior Developers.
  • High involvement with Product Manager from product design, to performance iterations.
  • Built a REST-based Financial Services API (https://api.getprosperi.com/api-docs/#/) and managed API deployment on render and domain configuration on BlueHost.
  • Managed web deployment on Netlify and domain configurations on BlueHost.

CarryCome, CapeTown, SA @STUDIO VENTURIS (https://carrycometrip.com)
Aug 2024 – Oct 2024

Full Stack Developer
  • Developed both backend (Firebase) and frontend (React) components.
  • Collaborated closely with the Product Manager, UI/UX Designer and a Senior Mobile Developer to deliver complete features from start to finish.
  • Maintained a balance between writing robust, tested code and quickly iterating to meet deadlines.
  • Handled Mailchimp newsletter subscription for the prelaunch using a Netlify function (https://prelaunch.carrycometrip.com).
  • Wrote a bunch of Firebase functions to send welcome emails, broadcast notifications, fetch existing users from Firebase and sync them to Mailchimp for newsletter subscription.
  • Wrote and deployed Firebase functions to handle in-app notifications for the mobile app (Flutter) - Android - (https://play.google.com/store/apps/details?id=com.seigneur.carrycome)and iOS - (https://apps.apple.com/us/app/carry-come/id6455304186)
  • Managed web deployment on Netlify and domain configurations on GoDaddy.

POWERLABS, Uyo, Nigeria (REMOTE WORK) (https://powerlabsenergy.com)
July 2024 - Aug 2024

Freelancer
- Worked with modern web technologies (React.js, TypeScript, and TailwindCSS for styling) to build the solar company website.
- Closely communicated with the Clients, and Designers.
- Integrated data fetching from Sanity CMS.
- Managed web deployment on Netlify and domain configurations on Cloudflare.

CEDEN Nigeria, Lagos, Nigeria (REMOTE WORK) (Domain expired https://cedennaija.org) (Check here instead https://cedennaija.netlify.app)
May 2024

Freelancer
- Built the user-facing site for a multi-sector investment organization from scratch using React, and TailwindCSS for styling.
- Managed web deployment on Netlify and domain configurations on Namecheap.

Usepays, Lagos, Nigeria (REMOTE WORK) @ CARGLE (https://usepays.co)
Apr 2024 - Jun 2024

Frontend Developer
- Developed a top-up with cash and airtime platform with authentication, and payment integration via flutterwave.
- Developed and maintained the frontend part.
- Worked closely with the Node.js backend engineers to integrate voucher recharge, and payment related APIs. The voucher platform was built using React.
- Worked closely with the Product Manager and the Lead Frontend Developer to deliver features end-to-end.
- Actively participated in code reviews and better code quality.
- Balanced the need for tested and resilient code against the need to move fast and iterate.

Unizonn, Uyo, Nigeria @SOFROSYNLABS (https://www.unizonn.com)
Aug 2023 - Apr 2024

Lead Frontend Developer
- Led a team of 2 frontend engineers (React.js, TypeScript]) and 1 mobile developer (Flutter).
- Worked closely with the Nest.js backend developers to integrate article, and post related APIs with real-time notifications. The social media platform was built using Next.js.
- Onboarded and reviewed code for Frontend developers.
- Involved in both frontend (Next.js, TypeScript, Tailwind) and tinkered with backend (Amazon, and PostgreSQL setup).

SKILLS

- TypeScript, React, Next.js, TailwindCSS, and Shadcn UI.
- Node.js, Express, MongoDB, and MySQL.
- Data layer platforms like Prisma ORM and Drizzle.
- File management storage solutions like Cloudinary and Uploadthing
- Collaboration tools like Slack, Jira, Teamhood and Clickup, etc.
- Familiar with frontend hosting platforms like Netlify and Vercel
- Familiar with backend hosting platforms like Railway and Render
- Time management skills and also a strategic and positional chess player.
- Currently learning no-code solutions like Bubble, and Airtable.
